

ChaiDEX is a multichain staking protocol and P2P exchange within the CeDeFi space. It enables users to maximize their cryptocurrency earnings through staking and re-staking mechanisms, instant swaps and low-fee Cross Chain P2P transactions. The platform's robust security features and governance model ensure user confidence and continuous evolution.

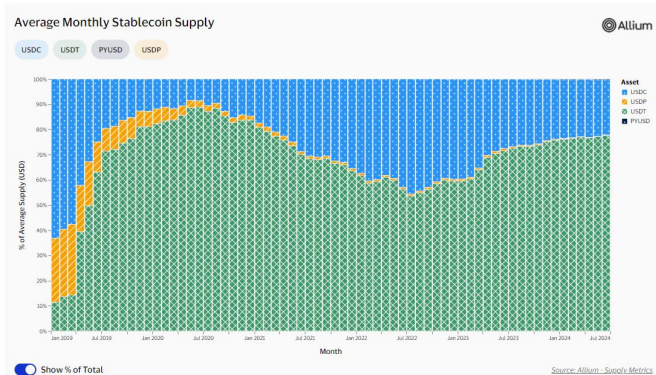

ChaiDEX's Products

Staking Mechanism

ChaiDEX's smart contracts allow users to stake various tokens, earning rewards from staking protocols and P2P trading fees. Automatic re-staking of unclaimed tokens ensures continuous earning potential and cryptoeconomic security. Users can diversify earnings across multiple staking pools, with exclusive incentives for those opting into automatic re-staking.

\$3.3T Total Transaction Volume Last 30 Days	328.5M Number of Transactions Last 30 Days	146.9B Average Supply Last 30 Days	30.1M Monthly Active Users (MAU) Last 30 Days

Local Stablecoins

ChaiDEX offers local stablecoins in Oman, the Philippines, Nigeria, India, and Vietnam, pegged to US-based stablecoins. These stablecoins provide a reliable store of value, enabling low-volatility transactions and predictable financial planning, and can also serve as collateral for loans.

Quick Swaps

The quick swap feature allows users to instantly swap tokens at market price, providing a seamless and efficient trading experience. This functionality ensures users can capitalize on market opportunities in real-time, making it ideal for both novice and experienced traders.

P2P Trading

ChaiDEX enables peer-to-peer cryptocurrency trading, reducing fees by eliminating intermediaries. Supporting protocol-to-protocol swaps between blockchain networks (e.g., BTC to SOL and many other pairs), it ensures secure, verifiable transactions, boosting user profits and promoting a community-driven trading environment.

Revenue Model

ChaiDEX sustains its operations through a transparent and minimal platform fee structure. Each transaction incurs a 0.1% platform fee, ensuring efficient trading while contributing to ChaiDEX's growth and sustainability.

0.1% Platform Fee on Each Transaction

\$CHAIT

The CHAIT token is central to ChaiDEX, serving multiple roles:

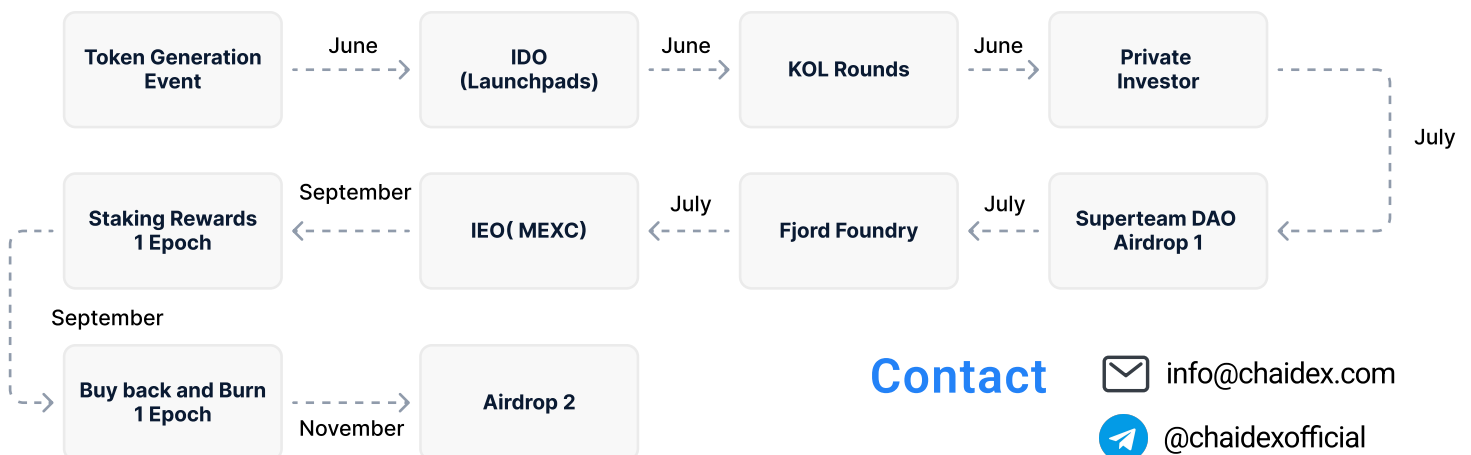

- **Governance**
CHAIT holders participate in platform governance.
- **Transactional Currency**
Facilitates fee payments and access to specialized features.
- **Staking Rewards**
Offers high returns and can be re-staked for compounded value.
- **Exclusive Features and Airdrops**
Rewards long-term holders with airdrops and exclusive features.

- **Development**
- **Marketing**
- **Team**
- **Investors**
- **Advisors**
- **ICO/IDO/With Public**

To enhance value, 50% of monthly fees will be used to buy back and burn CHAIT tokens, reducing supply and increasing value. This process will continue in stages until the total supply reaches 5 billion tokens.
